## CENTER FOR X RAY IMAGING

Dr. Larry Knight
Brigham Young University

| Overview | | Technologies | Status | Economic Impact |
|---|---|---|---|---|
| State Contract | $360,000 | •Atomic Layer Epitaxy (ALE) | •Spin-off company MOXTEK created with 6 jobs & sales of $150K in 1989 | •MOXTEK has received three Phase I SBIR grants |
| Matching Funds | $648,524 | •MultiLayer X-ray Optics | •10 years of experience in a difficult research area. Have become leaders with little or no competition | •Near term market for large & small X-ray windows is $6 million annually |
| Benefitting companies | 51 | •Leading edge technology in X-ray imaging | •Can create multi layer reflectors with film thicknesses (between 3 and 20A) | •$100 million markets possible in medical & non destructive testing areas |
| Industry jobs created | 6 | •X-ray laser technology | | •MOXTEK applying for Phase II SBIR's |
| Fac/Staff/Grad Stud/Doc | 23 | | | |
